Keep the Bitcoin, use for art school.

andhiriano OP • 7y ago

It’s not for you I’m sure about that. This is for people who have great mind.

luigyLotto • 7y ago

Until you don't prove the ownership of the wallet not much we will do. I have been doing cyber puzzles for a long time. This image has not a single hint that it could be a puzzle. So i completely understand his sarcasm XD

andhiriano OP • 7y ago

Wait for it. What the fun in a puzzle if i give away everything so easily? 🤔

21 days later.
Still no signed message for 13dCdvyYiPpiRQJgKdF7squZkyS9V8Ub7M. So likely here is nothing to solve / fake puzzle.

2 ...

andhiriano OP • 7y ago

1 ...

chudlin • 7y ago

im not so sure, ive been at it a while haha. i think i have an idea but i have no idea which way to take it

2 ...

starkwareindustries • 7y ago

Take it as you want it and give it a try. Keep updated. I would like to know you're work.

2 ...

andhiriano OP • 7y ago

It's about perspective.

2 ...

chudlin • 7y ago

there are lots of questionable things, but i just cant make any sense of much of it! tried math and others and cant make much of it and if i do it doesn't point me in any direction.. very hard! but whoever figures this out i would be very intrigued as to how it could be solved

2 ...

chudlin • 7y ago

would you mind dropping any other hints? :)

2 ...

andhiriano OP • 7y ago

Hint - look for the shapes.

Hmm. I've gotten 25 different private keys but they have no real idea behind them and none of them worked of course :D I can't find a pattern or make any sense of the shapes. I would like some proof of the address to keep going. I've already spent 24 hours on this in total.

2 ...

andhiriano OP • 7y ago

What are the keys you have got ? Wait for it.

1 ...

123herman123 • 7y ago

Haven't saved them since they didn't work and I had no base around them

2 ...

123herman123 • 7y ago

They keys I've tried involves the metadata

2 ...

andhiriano OP • 7y ago

Nothing involves in metadata. Everything is the painting itself.

Is there anyone who is on to something or could give me something I can look into? I'm stuck with the wrong theories.

123herman123 • 7y ago

What if she's smoking cannabis which could be a symbol of a hash

2 ...

andhiriano OP • 7y ago

You’re going somewhere.

1 ...

123herman123 • 7y ago

I don't really know what I am doing anymore but I've ended up with 4000+ private keys I'm going to scan trough. I'm going to try and write a python script to do so. This is a learning experience too :)

2 ...

chudlin • 7y ago

wow how you figure that? i found that i was looking for 15 or 12 of something but i dunno what

2 ...

123herman123 • 7y ago

I'll tell you when I've scanned all of them. I do believe none of them will be the right one. How did you come up with 15 or 12 of something?

2 ...

chudlin • 7y ago

looking at the shapes and a bit of math

How do I know in what order the seed should go?

2 ...

[deleted] • 7y ago

chudlin • 7y ago

so far i have managed to get some seed words that very nearly match up with the public address, but im still unsure as to where im going wrong. im literally super close.

2 ...

simple2019 • 7y ago

I can't see any words in pictures..... Only find single alphabet. Can you tell me how do you made them up words... I come from developing country,really want this money as you 😂😂😂

1 ...

chudlin • 7y ago

That's because there aren't any words in the picture. Look a bit deeper.

2 ...

simple2019 • 7y ago

Well there hasn't been a signed message, But That really doesn't guarantee anything. A large sum of BTC though grew much larger over 27btc now. seems odd that it would keep growing so much, but most the transactions are from 3 or 4 address' and I didn't see any outs just a lot of inputs. it would be a nice score if it is real. Although the only hint that I saw was about paying attention to the shapes. Though u/andhiriano did respond to someone about the painting with the woman smoking maybe hash. that was basically confirmed. So likely it is a hash of the data from the shapes (whatever that could be.). :)

1

hephil • 7y ago

How do I even start? Are the shapes 4 bit strings?

2

nickcorin • 7y ago

u/andhiriano perhaps a clue for us to know if we're headed in the right direction?

Do we need advanced software to crack this puzzle?

1 ...

slonyarakmw • 7y ago

It's amazing... But we need a proof that wallet, that contains bitcoin is your's

1 ...

addiebonker2 • 7y ago

How does this fit into the picture?

https://www.gofundme.com/fund-raising-for-art

This very painting was put on a fundraiser site about the time when the puzzle was published... goal 500$ "No amount is too small."

How do you post that while putting up 28 BTC as a prize?

Makes no sense for me... I think it is just publicity...the painting gets exposure while apparently being a still unsolved puzzle for a hight BTC prize...

1 ...

JD-007 • 7y ago

any update to this Puzzle ? @andhriano

1 ...

andhiriano OP • 7y ago • Edited 7y ago

THE PRIZE OF THE PUZZLE IS MORE THAN 10BTC

This is the bitcoin address which hold the fund.

Good luck everyone.

1 ...

luigyLotto • 7y ago
